### **Plethora of Plinths**

These have recessed tops (we filled them with magnetic sand and mylar which worked nicely) but any insert would enhance objects. Heavy and stable.

The ruler is 4' long

### **Slew of Slopers**

These are mostly 36" long, a couple are 24". The fabric-wrapped panel comes out and could easily be rewrapped. Small artifacts were "stitched" in place. Velcro held text panels. The fabric is Creation Baumann cotton.
