## Windows Workshop

Windows are one of the key character defining elements of buildings, and with proper maintenance, they can have a life cycle of a hundred years before needing repair or replacement. Learn how to repair common issues and perform proper maintenance with Ryan Bahris, owner and operator of Extraordinary League Contracting Ltd. (EXLE).

This in-person workshop will discuss the design and construction of wood windows, and practical considerations for their conservation and maintenance.

**Saturday, September 28th**  
**10am - 1:30 pm**

**\$75+tax**

## Conservation Plans

In many municipalities in BC, a Heritage Conservation Plan is a mandatory document for development permits involving a listed heritage property or for the purposes of a Heritage Revitalization Agreement, but it also represents a really helpful and thorough decision making process for owners of old buildings.

In this informative in-person workshop, heritage professional Elana Zysblat will illustrate how to create a Heritage Conservation Plan using real case studies.

**Wednesday, November 6th**  
**6pm - 9pm**

**\$45+tax**

## Heritage 101 On-Demand

We are recruiting participants to participate in our pilot cohort of the new and improved Heritage 101 this fall, thanks to a grant from the Government of Canada's Community Services Recovery Fund.

If you are interested in participating, please contact us at
