Gas Flatiron Accessories

B. Brass pump with black wooden handle. Stainless steel plunge
(This is by itself in A A003 S003. likely forgotten when the rest was sent to consignment. deaccession process for this item was resumed 2023/05/25)

C. Coleman measuring can. 10.1cm high yellow tin can with metal spout. Large quarter-size hole in top of can. Small hole in side near top. Writing on can: "Coleman Measuring Can for Instant-Lighting Irons. (1) This can measures the exact amount of fuel that should be put in the fuel tank. (2) Do not put more than one measure full of fuel to a filling. If more is used, the iron will not light properly. (3) Be sure to empty the fuel tank of the iron each time before filling to remove stale or sour gasoline. (4) Fresh gasoline is necessary for good lighting and long life of the generator." Opposite of the English directions are the French and Spanish versions.
